

Project Proposal

STUDENT DEPRESSION

This dataset contains various circumstances of young students to show how factors such as lifestyle and sleep duration can indicate depression in students.

- Reference: Adil Shamim, the author, collects the data while Israel Campero Jurado distributes it from “<https://www.openml.org/search?type=data&status=active&id=46753>”. It was last updated 5 months ago and is specified to have 10.00 credibility.
- Specifications: 2.8 MB, 27901 observations, 17 variables, Academic Pressure was rated on a scale of 1-5 which makes it categorical while Work/study hours is quantitative.
- Interesting questions: What is the correlation between academic pressure and suicidal ideation? Is there a correlation between depression in males and females? If there is a family history of depression, are you more likely to get it?

DIALYSIS FACILITY

This dataset contains data about all the dialysis services and quality of care registered with Medicare.

- Reference: CMS collected and distributed the data - “<https://data.cms.gov/provider-data/dataset/23ew-n7w9#overview>”.
- Specifications: 7 MB, 7,561 observations, 142 variables, interesting variables include determining if the facility took late shifts which is categorical and the number of dialysis stations offered at each facility which is quantitative.
- Interesting question: What is the relation between patient hospitalization and the availability of patient transfusions?

COVID-19 WORLD VACCINATIONS PROGRESS

This dataset contains data about the number of Covid-19 vaccinations on people from different regions around the world.

- Reference: Gabriel Preda, the author, collects and “Our World in Data” distributes data from “<https://ourworldindata.org/>”.
- Specification: 1.7 MB, 86,512 observations, 14 variables, people FULLY vaccinated (Quantitative)
- Interesting question: Do these countries have a daily quota to meet for vaccinations administered?
